Professional Summary

AI/ML Engineer specializing in Generative AI, LLM integration, Retrieval-Augmented Generation (RAG), and AI agents, with strong backend expertise in Python, FastAPI, and Node.js. Proven track record building production-grade NLP, automation, and conversational AI systems using React.js and SQL. Skilled at delivering scalable REST APIs and AI-driven products from prototype to deployment, for teams across global markets.

Technical Skills

- **Languages:** Python, JavaScript, TypeScript, SQL
- **AI / ML:** Machine Learning, Deep Learning, Generative AI, LLMs, Prompt Engineering, NLP, RAG, AI Agents, Vector Databases
- **Frameworks:** FastAPI, Flask, Node.js, Express.js, React.js, Next.js, NestJS
- **Libraries:** TensorFlow, Scikit-Learn, Pandas, NumPy, OpenCV, Matplotlib
- **Databases:** MySQL, MongoDB, Supabase, Prisma ORM
- **Tools:** Git, GitHub, VS Code, Postman, Google Colab, Jupyter Notebook

Work Experience

First Close Solution

May 2026 – Present

AI/ML Engineer

- Designed and deployed AI-powered enterprise applications, integrating LLMs into production workflows to automate manual business processes.
- Built scalable backend systems and REST APIs using Python, FastAPI, and Node.js for real-time AI service integration.
- Developed RAG pipelines and prompt engineering strategies, improving the accuracy of LLM-based features.
- Architected AI automation workflows that reduced manual operational effort and improved process turnaround time.

RevvTik

Aug 2025 – Apr 2026

AI/ML Engineer

Remote

- Built an AI-powered Sales Conversation Analysis platform, applying NLP to score and coach sales calls at scale.
- Engineered chat AI and voice AI pipelines combining speech and text analytics for real-time conversational insights.
- Integrated LLMs with custom prompt engineering to generate personalized coaching recommendations, improving response quality.

FM News

Aug 2025 – Jan 2026

AI & Data Analytics Intern

- Processed and cleaned large-scale datasets, building automated dashboards that streamlined reporting workflows.
- Applied SQL and NLP analysis to extract insights from text data, supporting editorial and business decisions.

Projects

AI Calling Agent – Human-like Voice AI Platform

LLM, STT/TTS, Prompt Engineering

- Developed a human-like AI calling platform integrating Speech-to-Text, Text-to-Speech, and LLM-driven conversation logic.
- Built campaign management and call analytics features to support outbound AI voice operations.

AI Sales Coaching Platform – Conversational AI for Sales Teams

NLP, LLM, Chat/Voice AI

- Built an AI conversation analysis engine using NLP and LLMs to generate coaching recommendations from sales calls.
- Combined chat AI and voice AI processing to deliver actionable, data-driven coaching insights.

QAMS AI – AI-Powered Attendance Management System

Python, MySQL, REST APIs

- Built an end-to-end attendance management system with Excel processing and automated report generation.
- Designed analytics dashboards for data visualization, streamlining attendance tracking and reporting.

Education

Bachelor of Technology, Computer Science Engineering (AI & ML)

2021 – 2025

IIMT University

Certifications
