

Question : 1 1.How you would develop a voice agent that can communicate in multiple languages.

Answer : 1 Development of a multiple languages voice agent. I would design an end-to-end pipeline that enables seamless multilingual voice interaction. The system will process speech input, understand the context, and respond in the same or desired language.

System Flow:

User speech -> Speech-to-text->Language
Detection ->NLP/LLM Processing -> Text
Response ->Text-to-Speech -> Voice Output

Tools

- 1: Speech-to Text (STT):
openAi Whisper for high-accuracy multilingual transcription.
- 2: Language Detection:
fastText/langdetect
- 3: Natural Language Processing:
GPT-4 via openAi API for contextual understanding and response generation
- 4: Text-to-Speech(TTS):
ElevenLabs
Google Text-to-Speech(cost-efficient option)
- 5: Backend Framewrok
Python(FastAPI/Flask)
- 6: Depoyment:
AWS/Google cloud platform / vercal

Advanced Features

Real-time streaming using websockets
context retention using vector databases
emotion-aware responses
Accent and dialect adaptation

Question 2: 2.How you would build an AI chatbot for WhatsApp.

I would build a scalable Ai-powered chatbot integrated with WhatsApp using official APIs. The system will handle user queries, automate responses, and support business workflows.

system flow:

User Message -> WhatsApp Api -> Backend server -> Ai processing-> response -> whatsapp delivery

Tools

Whatapp integration :

- whatapp business api

- Twilio Whatsapp Api

Backend :

- Node.js or python

Ai engine :

- openAi GPT API

- Langchain

Database:

- MongoDB / Postgresql / supabase

Hosting:

- AWS/ Vercel / Railway

Advanced Features

- Retrieval-Augmented Generation (RAG)

- CRM integration (HubSpot, Zoho)

- Conversation analytics and dashboards

Question: 3 3.How you would create and run a digital marketing campaign focused on performance marketing.

Answer : 3

I would Implement a data-driven performance marketing strategy focused on maximizing ROI through continuous optimization and analytics.

channels

- Google Ads

- Meta Ads

- Email marketing

- Landing pages

Tools :

- Google Analytics

- Meta Business Manager

- SEMrush / Ahrefs

- Hubspot CRM

Advanced strategy

- Ai-driven audience targeting

- Lookalike audience modeling

- Funnel automation

- Conversion Rate Optimization (CRO)
