

## Professional Summary

---

Artificial Intelligence and Machine Learning Engineer with hands-on experience building intelligent systems using **Python, TensorFlow, PyTorch, and Scikit-learn**. Skilled in **Machine Learning, Deep Learning, Computer Vision, Natural Language Processing (NLP), Predictive Analytics, and Data Science**. Experienced in **data preprocessing, feature engineering, model training, and model evaluation**. Passionate about developing AI-powered products and solving real-world problems using scalable AI technologies.

## Technical Skills

---

**Programming:** Python, SQL, JavaScript, C, HTML, CSS

**Machine Learning:** Machine Learning, Deep Learning, CNN, NLP, Computer Vision, Predictive Modeling

**Frameworks:** TensorFlow, PyTorch, Scikit-learn, OpenCV

**Libraries:** Pandas, NumPy, Matplotlib, Seaborn

**Data Skills:** Data Analysis, Data Cleaning, Feature Engineering, Model Evaluation, Data Visualization

**Tools:** Git, GitHub, VS Code, IntelliJ, Tableau

**Databases:** MySQL, MongoDB

## Experience

---

### AI & Data Analytics Intern

FM News, Noida

Aug 2025 – Jan 2026

- Analyzed **12k+ audience engagement records** using Python, Excel, and Google Sheets to identify performance trends.
- Designed automated dashboards improving analytics workflow efficiency by **30%**.
- Generated weekly data insights improving **SEO performance and audience reach by 20%**.

### AI / Machine Learning Intern

Camplain Technologies, Bangalore

Jul 2023 – Sep 2023

- Developed **CNN and NLP-based machine learning models** using TensorFlow and Scikit-learn on **8k+ dataset samples**.
- Applied feature engineering and model optimization improving model accuracy by **18%**.
- Built machine learning pipelines processing **5k+ records** reducing training time by **25%**.

## Projects

---

### RivvTik – AI Sales Automation Platform

- Developed an **AI-powered sales automation platform** designed to capture, qualify, and respond to customer leads automatically.
- Built intelligent **AI chat workflows and automation pipelines** for handling customer queries and sales interactions.
- Integrated **NLP-based conversation processing and AI response generation**.
- Designed scalable architecture for **lead tracking, automated responses, and customer engagement**, improving response efficiency by **35%**.

### Horssa – AI Powered Horse Marketplace Platform

- Built an **AI-powered horse marketplace platform** enabling buyers and sellers to trade horses online.
- Implemented advanced **search, filtering, and recommendation systems** improving product discovery efficiency by **40%**.
- Developed full-stack architecture using **Next.js, Supabase, and modern web technologies**.
- Designed analytics features enabling **data-driven decision making** for marketplace users.

**Education**

---

**B.Tech – Computer Science (AI & ML)**

IIMT University

2021 – 2025

CGPA: 6.7

**Certifications**

---

Artificial Intelligence – Kodacy

Data Analytics using Python – Samatrix

Statistics using Python – Samatrix

Data Analytics – Deloitte
